

How to read a research paper

Philipp Eisenhauer

Figure: Scientific Reading

Levels of reading

- ▶ elementary
- ▶ inspectional
- ▶ analytical
- ▶ syntopical

Reading strategies

- ▶ preview and skim
 - ▶ look for structural cues: headings, sub-headings, figures or images
 - ▶ look for context: where, when, who created the text
 - ▶ attempt to infer author's purpose and audience

- ▶ read actively
 - ▶ annotate the text with your questions
 - ▶ relate text to your own beliefs and experiences
 - ▶ identify new terms, concepts or sources to explore
 - ▶ note key points or conclusions

- ▶ outline and summarize
 - ▶ outline to see structure and flow of the text
 - ▶ summarize to check understanding
 - ▶ state main points and thesis for quick review

- ▶ question and wonder
 - ▶ how does the work contribute to your inquiry
 - ▶ how might the source help as evidence, background, and argument?
 - ▶ what evidence or persuasion does the author supply (fact, opinion, assumption)?
 - ▶ how does the text relate to other readings (contradict, support, extend)?

- ▶ reread and reflect
